

Product Name

Name: Iscove's Modified Dulbecco's Medium (IMDM), with L-Glutamine

Cat. No.: C3040-0500

Size: 500 mL

Product Description

Iscove's Modified Dulbecco's Medium is an enriched modification of Dulbecco's Modified Eagle's Medium wherein serum can be partially or totally replaced by chemically defined substances. The medium contains additional amino acids, sodium selenite, sodium pyruvate, vitamins, and inorganic salts. Potassium nitrate is substituted by ferric nitrate. IMDM was the first medium utilizing HEPES buffer. Appropriately supplemented, the medium supports the growth of precursor cells of erythrocytes and macrophages. The medium also supports the growth of T and B lymphocytes as well as a variety of hybrid cells under serum-free or reduced serum conditions.
